

## PROBLEM WE SOUGHT TO ADDRESS

Because of a poor water supply pipeline, the residents of Milavac village did not have safe drinking water and at times, especially during summer, an inadequate supply of water. The residents of Milavac organized themselves and formed the Tračak Nade (A Glimmer of Hope) Association to address this problem by themselves: namely, to drill a new deeper well to obtain a sufficient supply of clean drinking water and to install a pump that would supply water to the secondary water network connected to their households.

**During the December 2013 DobroČiniTi event, we raised a total of 357,000 RSD together in order for 200 residents of the village to have a sufficient amount of clean drinking water.**

## WHAT HAS BEEN ACHIEVED THANKS TO OUR ASSISTANCE?

Outputs:

- Exploration works (well testing)
- Completion of project documentation
- Clearing of drill site
- Drilling of 125 m deep well
- Installation of pump
- Laying of water supply pipes
- With the resultant water supply capacity of 130 l/min, it is sufficient for Milavac and for several nearby villages

### **Dragan Stanković**

*I didn't believe the young people when they told me that they are trying to drill a well...but they convinced me when I saw the machine coming to the village and then I watched it work and admired them. When I received the water at my house, I wanted to jump with joy.*

### **Miroslav Milošević**

*As long as these kids are around, our life in the village will be much easier and better because we know that there is finally somebody who cares about the problems of the village.*

### **Milan Lozanac**

*We need to build a monument in memory of what these kids have done for the village.*

## WHAT HAS DOBROČINITI FUNDING HAS MEANT FOR TRAČAK NADE

*Everyone took part in cleaning, even 5 year old children. I am happy that we were able to drill a well despite all the problems we were came across. We have learned that there are various ways to address a problem, and also we have learned a lot about the law.*

*I have only the words of praise for the cooperation with DobročiniTi. They were with us every day to provide a piece of advice and help. Considering that we were the first to obtain funds this way, I hope that they have continued donating funds to people in need. Keep doing what you are doing and I wish you many many more years of work.*

Maja Mitrović, Tračak Nade Association Coordinator

## FINANCIAL REPORT

This is how the raised funds were spent:

Purpose	Planned	Spent	Documents
Drilling of 125 m deep well	223,000.00	223,000.00	Bills, cash invoices, bank statements
Exploitation part of the well with PVC casing and a sedimentation tank for the well	109,861.92	109,861.92	Bills, cash invoices, bank statements
Connecting the pump with the well	24,138.08	24,138.08	Bills, cash invoices, bank statements
<b>Total</b>	<b>357,000.00</b>	<b>357,000.00</b>	

Catalyst staff verified the invoices and bank statements. The remaining amount of money required for equipment and works was donated by Trag Foundation because the municipal authorities withdrew their commitment to co-finance the well. Copies of invoices and bank statements are an integral part of the financial report and are available for review.
