*The significant differences between the two years are explained on the next page.
In 2015, the most active donor types by number of recorded donations were mass individual (60.0%), followed by corporate sector (11.8%) and individuals (9.4%). Other donors included mixed category (more types of donors involved in the same donations), associations and religious entities. Their joint share in number of instances is 18.8%.

Looking at donor types through the lens of the value of donations, the picture is the same: mass individual donations take the lead with a 59.1% share in total recorded amount, followed by the corporate sector with a share of 8.9%, and individuals with a share of 5.4%. The share of other donors is 26.6%, mostly from associations.

In we analyze giving by diaspora, the percentage of recorded instances is only 1.2% while there are no recorded values of donations this year.

Overall, there are a few aberrations between the 2014 and 2015 giving data, which can be explained by several factors:

- Significant increase in recorded value of donations, as our methodology for gathering and confirming the data has improved.
- This year’s unusually high value of donations by citizens were due to campaigns for medical treatments for children which gained huge response throughout Albania.
- Drop in giving by known individuals which is due to smaller investments in 2015. In 2014, there were several larger donations from known individuals to address the housing needs of people in economic need.
CORPORATE SECTOR
Profiles of the Most Common Types of Donors

TOP 3 RECIPIENT ENTITIES
- Individuals / Family: 40.0%
- Institutions: 30.0%
- Nonprofit Organizations: 20.0%

TOP 3 THEMES FOR GIVING
- Support to Marg. Groups: 30.0%
- Healthcare: 30.0%
- Emergency Management: 20.0%

TOP 3 FINAL BENEFICIARY GROUPS
- People from Specific Geography: 40.0%
- Children/Youth Without Parental Care: 30.0%
- People with Health Issues: 20.0%
EXAMPLES OF CORPORATE SECTOR DONATIONS

**Tirana Bank** has "adopted" three children from the SOS Villages in Albania, committing to financing all their costs while they are placed in the Village.

By using their credit cards, clients of **Alpha Bank Albania** supported the bank’s campaign for helping women with breast cancer. While the campaign is raising awareness of this issue in Albania, a donation of 25,000 EUR will be used for psychosocial support for women.

**Telekom Albania** had an interesting action of distributing 20 iPads for the use of children that are going through therapy in the hematology oncology ward of the Tirana Hospital. This gift will enable children to do their schoolwork and follow their classes and will also provide entertainment for children.

**Support During the Floods**

The corporate sector was significantly involved in providing support to families affected by floods in Albania. Thus, **Telekom Albania** donated electrical appliances, while Albpetrol distributed food and clothing.

Two further interesting examples of flood-related giving come from Vodafone Albania Foundation and Philip Morris.

**Philip Morris**, in cooperation with Young Women’s Christian Association (YWCA), donated cattle valued at 80,000 USD to families affected by the floods in Fier.

**Vodafone Foundation** donated aid packages to 500 families affected by the floods in Vlore and Fier; however, they went step further, by launching the Red Alert campaign which will inform all Vodafone clients about any future natural disaster and enable them to help by donating through a special SMS number.
MASS INDIVIDUAL
Profiles of the Most Common Types of Donors

**TOP 3 RECIPIENT ENTITIES**
- Individuals / Families: 84.3%
- Institutions: 5.9%
- Nonprofit organizations: 3.9%

**TOP 3 THEMES FOR GIVING**
- Poverty Reduction: 31.4%
- Support to Marg. Groups: 27.5%
- Healthcare: 21.6%

**TOP 3 FINAL BENEFICIARY GROUPS**
- People in Economic Need: 33.3%
- People with Disabilities: 11.8%
- People from Specific Geography: 9.8%
- Children/Youth Without Parental Care: 7.7%
EXAMPLES OF MASS INDIVIDUAL GIVING

Actors of National Theater in Tirana opened a special bank account and launched a campaign appealing for support from the general public and corporate sector. The campaign’s goal was to collect funds for the renovation of National Theatre, which is in quite bad condition.

An unusual fundraising event was organized in the Rogner Hotel in Tirana. A gay couple from London travelled to Albania to get married on the International Day Against Homophobia. Guests of the wedding ceremony were invited to make donations to the safe space for members of the LGBT community in Albania.

The annual marathon organized by the Medical Response for the Diplomatic Corps nonprofit, in cooperation with Vodafone, raised funds in 2015 for the Tirana Pediatric Hospital in support of treatment and care for children with cancer.

Support During the Floods

In 2015, there were a number of collective actions organized that mobilized groups of individuals to provide support to families in the several regions of Albania that were hit by flooding.

Some examples include: the Albanian Muslim Community distributed food packages; the Steel Wings Motorcycle Club collected and then distributed needed supplies to families affected by the floods in Vlora and Fier; the Agency for the Support of Civil Society (AMSHC) collected 2 tons of food from citizens; and the Red Cross of Albania provided food, clothing and other supplies to over 4,500 families.
Data for Albania regarding the use of donations shows that as much as 70.6% of recorded instances are directed to one-off support (humanitarian support, medical treatments of individuals, individual housing). A significantly smaller percentage of 15.3% is directed to support that may produce long-term effects (capital investments, equipment, scholarships and the like). This figure is a somewhat smaller when comparing giving in other countries of the region. The corporate sector, as in other countries, shows a greater preference for giving strategically: 30% of their donations are those with potential long-term effect while citizen’s support to strategic giving is only 9.8%.

**Telekom Albania** donated needed medical equipment to the health clinics in Theth and Razme, thus modernizing the healthcare facilities in these communities.

In 2015, the most frequent recipients of giving were individuals and families (76.5%). Institutions were the second most common destination of donations (10.6%). Nonprofit organizations received only 8.2% of the donations, although this was an increase when compared with giving data from 2014.

State-controlled recipients include institutions and local and/or national governments. 11.8% of the instances of giving were recorded as being given to the state, which is a significant decrease in comparison with 2014.

Given that the value of the donation in Albania was reported in only 4.7% of the instances, estimation about the total amount donated is made by extrapolation based on the known data. For more information, please find the full report at:
